

Problem set 1

S670 Spring 2019

Upload a HTML/PDF/Word document with your code and your graph to Canvas by 11:59 pm, Wednesday 16th January.

Using the files `nba2017-18.csv` and `pacers2017-18.csv`, draw a dot plot of the heights (in inches) and positions of all players who appeared for the Indiana Pacers during the 2017-18 season that improves on the plot below that we drew on Tuesday (for a different team.) “Improve” might mean grouping, better color choices, or some other improvement of your choice. All data cleaning must be done through R.

You may (and are encouraged to) work with other members of the class, but each individual should upload their own submission with their name on it.
